

Easy Climate

The perfect micro climate for piglet and sow

Now with
replaceable soft
PVC flaps!

The see through cover enables easy checking of your piglets and keeps draught out. To ensure top performance in the farrowing house, sows must be able to eat as much as they can so they produce enough milk. By creating a microclimate for the piglets with Vereijken Easy Climate, you can quickly bring down the temperature for the sow so she continues to eat well.

Create a perfect climate for your piglets without draught and an easy view on your piglets!

While your piglets lie in the warm piglets nest, the risk on piglet losses because of crushing is minimalised.

Create a safe environment for your piglets

Keep draught out

Our models:

- Straight:
 - 1450 x 450 mm
 - 1180 x 450 mm
