

Pro Dromi[®] Up

Loose housing with guaranteed less mortality!

Changing to loose housed sows in farrowing may seem difficult, especially when you work with regularly changing staff. But the Pro Dromi[®] Up enables every farmer to work with loose housing without the risk on crushed piglets, using the Vari Free lift floor in the first 48 hours.

- Lift floor saves up to 80% of crushed piglets
- 15 years of experience
- Perfect grip and hygiene for sow and piglets with the Pro Grip floor

When you consider a loose housing system, you ask yourself; will my piglet mortality increase? The key to success is the Pro Dromi Up®! A combination of two proven concepts:

- Separate climates for sow and piglet, proven in Pro Dromi® systems.
- Minimal risk of crushed piglets by using a Vari Plus lift® floor has proven itself for 15 years'

The Pro Dromi® Up complete loose housing solution is the best of both worlds. The Pro Dromi® Up **guarantees** minimal losses, and enables **optimal access to the udder**. Which can only result in **Premium piglets!**

What are the benefits of a lift floor in loose-housing?

- Save up to 80% of crushed piglets
- In line with all European legislation
- Pro Grip flooring with high-low profile, designed for perfect grip, safety and optimal lying comfort of sow and piglets

Optimal Macro/Micro climate for sow and piglet

- A water heated piglet nest (32°C)
- Easy climate cover for above the piglet nest
- Fresh-nose ventilation for the sow (18°C)
